Period for Reply	communication app	pears on the cover sheet with the	ne correspondence add	ress				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).  Status								
1) Responsive to communica	tion(s) filed on <u>25 د</u>	<u>July 2002</u> .						
2a) ☐ This action is FINAL.	2b)⊠ Th	is action is non-final.						
closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213. <b>Disposition of Claims</b>								
4) Claim(s) 1-26 is/are pendin	g in the application	<b>).</b>						
4a) Of the above claim(s)	is/are withdrav	wn from consideration.						
5) Claim(s) is/are allow	ed.							
6) ☐ Claim(s) is/are rejected.								
7) Claim(s) is/are object	ted to.							
8) Claim(s) <u>1-26</u> are subject to	restriction and/or	election requirement.						
Application Papers								
9)☐ The specification is objected to by the Examiner.								
10) ☐ The drawing(s) filed on is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.								
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).								
11) The proposed drawing correction filed on is: a) approved b) disapproved by the Examiner.  If approved, corrected drawings are required in reply to this Office action.								
12) The oath or declaration is objected to by the Examiner.								
Priority under 35 U.S.C. §§ 119 and 120								
13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).								
a) ☐ All b) ☐ Some * c) ☐ None of:								
1. Certified copies of the priority documents have been received.								
2. Certified copies of the priority documents have been received in Application No								
3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).  * See the attached detailed Office action for a list of the certified copies not received.								
		·		annlication)				
14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).  a) ☐ The translation of the foreign language provisional application has been received.								
15) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.  MARK SAGER

## **DETAILED ACTION**

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to a toy gun having a game input device, classified in class463, subclass 51.
- II. Claims 19-21, drawn to a toy gun having the ability for the player to change the infrared beam characteristics, classified in class 463, subclass 54.
- III. Claims 22-25, drawn to a toy gun having the ability to calculate a player's game condition and feedback corresponding to the condition, classified in class 463, subclass 56.
- IV. Claim 26, drawn to a toy grenade having a time delay, classified in class 463, subclass 49.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions differ such that Inventions I-III are toy guns with a trigger for emitting infrared beams and Invention IV is a toy grenade with a timing device for a time delay. Invention IV, as claimed, can be used be used with a variety of games other than Invention I and therefore has its own distinct functionality.

-Application/Control Number: 09/915,400

Art Unit: 3714

Because these inventions are distinct for the reasons given above and the search required for Inventions I-III is not required for Invention IV, restriction for examination purposes as indicated is proper.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particular feature of the subcombination (the ability for the player to change the infrared beam characteristics) as claimed because each invention has its own specific technical features. The subcombination has separate utility such as the ability for the player to change the infrared beam characteristics.

Because these inventions are distinct for the reasons given above and the search required for Invention I is not required for Inventions II, restriction for examination purposes as indicated is proper.

Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particular feature of the subcombination (the ability to calculate a player's game condition) as claimed because each invention has its own

-Application/Control Number: 09/915,400

Art Unit: 3714

specific technical features. The subcombination has separate utility such as the ability to calculate a player's game condition.

Because these inventions are distinct for the reasons given above and the search required for Invention I is not required for Inventions II, restriction for examination purposes as indicated is proper.

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention II has separate utility such as toy gun having the ability for the player to change the infrared beam characteristics, while Invention III is a toy gun with the ability to calculate a player's game condition. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Invention I is not required for Inventions II, restriction for examination purposes as indicated is proper.

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aaron J. Capron whose telephone number is (703) 305-3520. The examiner can normally be reached on M-F 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Hughes can be reached on (703) 308-1806. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9302 for regular communications and (703) 872-9303 for After Final communications.
